AP Psychology:
Diagnosing Language Deficits

In the space below, please explain what is happening in the picture above:

Name _____

AP Psychology:
Diagnosing Language Deficits

The following transcripts are from two patients whose task was to examine the same picture you just did, and to verbally describe what was happening in the picture.

TRANSCRIPT 1:

You know that smoodle pinkered and that I want to get him round and take care of him like you want before... But already then ... I can't see well enough but I believe that either she or will have some food that's not good for you and she's to get some for her too... Well this is ... Mother is away here working her work out o'here to get her better, but when she's looking, the two boys looking in other part. One their small tile into her time here. Ive done a lot well, I impose a lot, while, on the other hand, you know what I mean, I have to run around, look it over, trebbin and all that sort of stuff... She's working another time because she's getting, too and that you get it and you shouldn't get it there because they shouldn't go up there and get it unless you tell them that they could have it. And so this is falling down and for sure there's one they're going to have for food and, and didn't come out right, the uh, the stuff that's uh, good for, it's not good for you but it, but you love it, um mum mum (smack lips)

TRANSCRIPT 2

Wife is dry dishes. Water down! Oh boy! Okay
Awright. Okay ... Cookie, down... fall, and
girl, okay, girl ... boy, um ...

AP Psychology:
Diagnosing Language Deficits

1. Carefully describe what the patient from ***Transcript 1*** can do and apparently cannot do in terms of language. It may be helpful to compare your own description to the patient's:

2. **Your hypothesis:** What is your best guess about the cause of this patient's language deficit? (Be specific)

3. Describe 1 behavioral test that you could administer to test your hypothesis, and what the result might be if your hypothesis is correct.
 - Behavioral Test

 - Behavioral Test Result

4. Describe 1 non-behavioral test that you could administer to test your hypothesis, and what the result might be if your hypothesis is correct.
 - Non-behavioral Test

 - Non-behavioral Test Result

AP Psychology:
Diagnosing Language Deficits

1. Carefully describe what the patient from **Transcript 2** can do and apparently cannot do in terms of language. It may be helpful to compare your own description to the patient's:

2. **Your hypothesis:** What is your best guess about the cause of this patient's language deficit? (Be specific)

3. Describe 1 behavioral test that you could administer to test your hypothesis, and what the result might be if your hypothesis is correct. (Test should be different from test on other side of the paper.)
 - Behavioral Test

 - Behavioral Test Result

4. Describe 1 non-behavioral test that you could administer to test your hypothesis, and what the result might be if your hypothesis is correct. (Test should be different from test on other side of the paper.)
 - Non-behavioral Test

 - Non-behavioral Test Result
