

Zombie Restaurant Menu

You will need to design a menu for a restaurant for zombies. As you know, zombies are fond of eating brains, and your goal is to create five mouth-watering brain dishes for them to enjoy.

The name of your restaurant should be prominent on the menu page and the name of the restaurant must be creative – think of a name that would be attractive to zombies. Each of your five dishes must reflect a different part of the brain and be creatively named.

Be sure the name of the dish matches the function of the brain part as well. Each of the five dishes must include something about the function of that part, and will need to be described in an attractive way so that a zombie will look forward to the dish – that is, don't just mention that you are serving pituitary gland, but perhaps “grilled pituitary that grows in your plate over a bed of sautéed jasmine rice.”

The areas of the brain you can choose include:

Occipital lobe
Parietal lobe
Frontal lobe
Temporal lobe
Hippocampus
Amygdala
Thalamus
Cerebellum
Hypothalamus
Pons
Reticular formation
Medulla
Any of the 5 cortical areas

How will it be graded?

_____ 5 Points Effort (neatly done, use of color, no misspelled words, etc.)

_____ 5 Points Creativity (original concept, catchy restaurant name, dish descriptions enticing to zombies)

_____ 10 Points Information (correctly identify five parts of brain and associated abilities)

Some examples to get your creative juices flowing!
